

Desigo CC, the open building management platform, is designed to meet your needs today and in the future

The open building management platform is designed to create comfortable, safe and efficient facilities today and in the future

Visualize and manage all rooms from one location and control all disciplines

Check performance, increase transparency and make system changes even in the field level easily

Desigo CC – the leading building management platform: open, modular & flexible, efficient and user-friendly

Desigo CC

Open platform

- Open standards
 (BACnet, OPC, Modbus ...)
- Web services (northbound)
- Driver SDKs (southbound)
- Ecosystem

1 0 1 1 0 0 BACnet Modbus OPC SNMP Onvif IEC 61850

Modular & flexible

- Single or multi-discipline
- Scalable in size
- Modular and extendable in applications and features

Efficient

- Strong workflow concept
- Assisted event treatment
- Easy engineering
- Remote access

User-friendly and easy

- Unique state-of-the-art
 Ul design
- One platform to learn and operate
- Multiple screen approach
- Advanced vector graphics

Complete transparency and control with Desigo CC

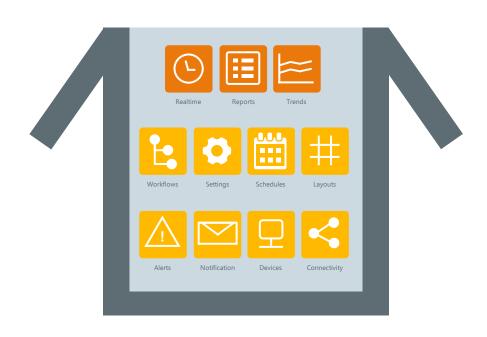

Single systems

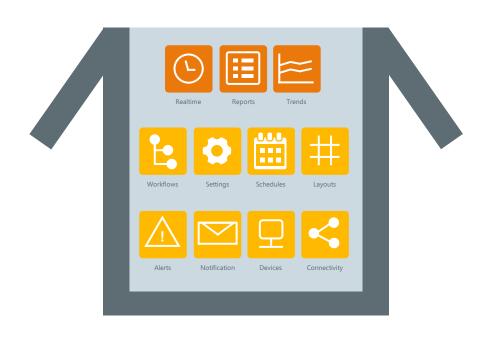

Multiple systems

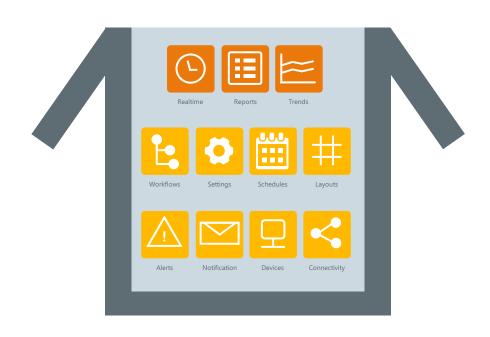

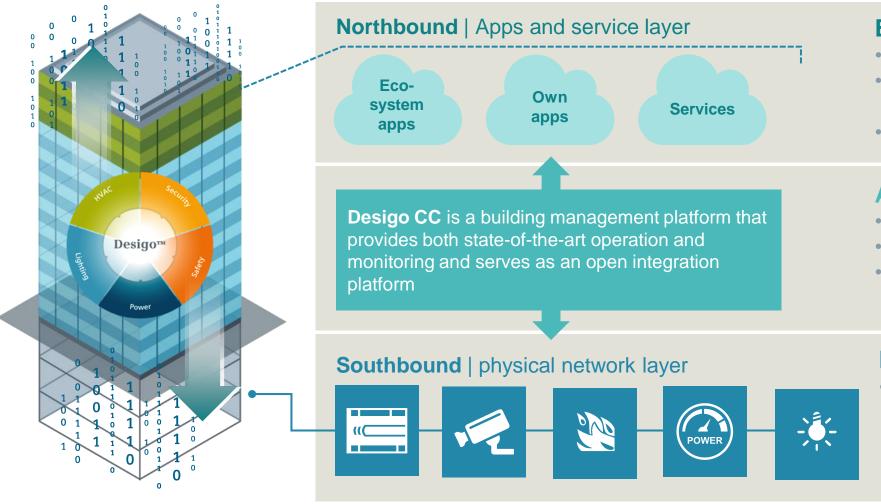

Multiple disciplines

Desigo CC openness: create own apps, develop integrations to different systems

Enrich with apps & services

- Powerful open APIs
- Create own apps or leverage the Ecosystem
- Platform to provide services

Adapt and tailor

- Flexible and modular system
- Unique user interface
- Powerful building management functionality

Integrate all

 Integrate subsystems from multiple disciplines via global standards such as BACnet, Modbus, OPC, etc.

Desigo CC

The integrated building management platform

- Safe environment
- Optimized comfort
- Control over unwanted events
- Comprehensive monitoring
- Easy maintenance
- Continuous optimization
